Matter Turbulent 0x3348 January 13th, 2023

PeopleDAO Multisig Governor Election 2023 Candidate Information and Rules The Criterion

1. A multisig Governor shall be able to comprehend and use the basic functions in the Safe (formerly Gnosis Safe) to sign and approve transactions.
2. A multisig Governor shall be able to devote a reasonable amount of time to fulfilling the duties and responsibilities of the role, which mainly include participating in necessary meetings and verifying and signing transactions based on democratic resolutions of PeopleDAO.
3. A multisig Governor shall exercise due diligence to safeguard his or her own key through any reasonable means. Although the multisig is designed to protect assets even in cases of compromise on the part of the signers, each Governor still needs to act responsibly.
4. Outside candidates (those not originally from the PeopleDAO) who are \$PEOPLE token holders are welcomed, provided they act in good faith and are able to fulfill the above-mentioned requirements.
5. The service term for our multisig Governor will be determined by a community vote on Snapshot in the upcoming PeopleDAO Improvement Proposal 33 (i.e., PIP33).
6. The monthly remuneration of the multisig Governors will be determined by

the Operations Team (Ops Team) of PeopleDAO in their seasonal budget proposals. The Governors will be rewarded a minimum of 1,000 \$PEOPLE tokens per month, subject to increment depending on the Ops Team's budget allowance and needs.

I have been an active member since i joined June 30, 2022. Taking on tasks ranging from tutorials and mostly design task one which was the redesigning of the PeopleDAO website alongside three other designers. I came in to the DAO proposing to use sobol as a tool to map the DAO which was warmly accepted but since it is a new DAO Tool, more needs to be researched about it before continuing which was the tutorial i wrote. I was fascinated by how the DAO itself runs mostly on contributors who are willing to give their all to the DAO irrespective of the market condition, this i admired greatly since i always make sure my goal remains the same in all DAOs i have contributed. The aligned goal between the DAO working system and mine made me decide to stay and become an active contributor myself.
